Biography

Mosope has over five years of experience in IT Operations supporting multiple industries and working with various eDiscovery software's. He works with lawyers and vendors to provide the most cost-effective and efficient solution for litigation cases. He specializes in handling the retrieval of relevant documents from cloud or on-premises platforms and focuses on eDiscovery support for lawyers and clients nationwide. Mosope provides electronic data collection and case set-up. He also assists with data collection from all devices, both mobile and enterprise, with specific focus on keeping the integrity of the data collected.

Mosope previously worked in the banking and Telecommunications industry. He was an IT Support Analyst and handled Enterprise infrastructure for internal clients under multiple applications including, Active Directory, Active Roles Server, Citrix Servers, Terminal Services, RSA Management, Airwatch, Virtual Desktop Infrastructure troubleshooting, ServiceNow (Enterprise Incident Management), Microsoft Office 365, Windows 7 & 10 Edge Environment support.

Mosope is passionate about Kid's Health and through ExtraLife, has combined it with his passion for online gaming. ExtraLife engages people from around the world to use online gaming to raise money for sick kids in hospitals across Canada. Mosope and his group (Buncha Hackers) have raised money three years in a row for ExtraLife.

Education

- Certification in ITIL Foundation Level for Incident Management
- Masters in Engineering, Western University
