Biography

EDUCATION

- Certification in ITIL Foundation Level for Incident Management
- Masters in Engineering, Western University

Mosope has years of experience in IT Operations, specializing in eDiscovery support across multiple industries. He works closely with lawyers and vendors to deliver cost-effective and efficient solutions for litigation cases. Mosope manages electronic data collection from cloud and on-premises platforms, ensuring data integrity throughout the process. His expertise includes setting up cases and retrieving relevant documents from various devices, including mobile and enterprise systems. Mosope's skills make him a valuable asset in navigating the complexities of eDiscovery for lawyers and clients nationwide.

Mosope combines his passion for kids' health and online gaming, working with a global initiative that raises funds for children's hospitals. Alongside his group, he has helped raise money for several years to support sick kids across Canada.

With a background in banking and Telecommunications, Mosope proficiently managed enterprise infrastructure and a range of applications, showcasing his expertise in Active Directory, Citrix Servers, and Microsoft Office 365 support.
